

Action plan submitted by naciye bütün for Sazlıpınar Ortaokulu - 04.02.2020 @ 22:15:24

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

Infrastructure

Technical security

- It is very good that all your school devices are virus protected. Make sure you also have included a paragraph on virus protection in both your school policy and your Acceptable Use Policy, and ensure that staff and pupils rigorously apply school guidelines. If you need further information, check out the fact sheet on Protecting your devices against malware at www.esafetymalware.eu/group/community/protecting-your-devices-against-malware.
- An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See www.europa.eu/youth/EU_en for examples of discussions that can take place in the classroom on this topic, through role-play and group games.

Pupil and staff access to technology

- All staff and pupils are allowed to use USB memory sticks in your school. This is good practice, and your Acceptable Use Policy should stipulate that all removable media is checked before use in the school systems. Check the fact sheet on Use of removable devices at www.esafetymalware.eu/group/community/use-of-removable-devices to make sure you cover all security aspects.
- It is good that in your school computer labs can easily be booked. Consider the option of integrating other digital devices into the lessons as using them provides best practise for pupils in dealing with new media. Ensure that safety issues are also discussed.

Data protection

- You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share

them with others.

Software licensing

- › It is important to ensure that all new staff are briefed about the effective processes you have for the installation of new software. This will mean that the security of your systems can be maintained and that staff can try out new software applications that will help teaching and learning.
- › It is good practise that the member of staff responsible is fully aware of installed software and their license status.

IT Management

- › It is good practice to ensure that the person in charge of the ICT network is fully informed of what software is on school-owned hardware and this should be clearly indicated in the School Policy and the Acceptable Use Policy. The person responsible for the network needs to be able to guarantee conformity with licensing requirements and that new software won't interfere with network operation.
- › It is good practise that you are training and/or providing guidance in the use of new software that is installed on school computers. This ensures that school members will take advantage of new features, but also that they are aware of security and data protection issues where relevant.

Policy

Acceptable Use Policy (AUP)

- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at www.esafetylevel.eu/group/community/acceptable-use-policy-aup-.
- › Regularly review the Mobile Phone Policy to ensure that it is fit for purpose and that it is being applied consistently across the school. The fact sheets on Using mobile phones at school (www.esafetylevel.eu/group/community/using-mobile-device-in-schools) and School Policy (www.esafetylevel.eu/group/community/school-policy) will provide helpful information.

Reporting and Incident-Handling

- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline (www.inhope.org).
- › It's good that you have a clear School Policy on handling out-of-school eSafety incidents; is the number of these declining? Start a discussion thread in the community on what other preventative measures or awareness raising activities could be used in order to reduce the number of issues further. Don't forget to anonymously document incidents on the Incident handling form (www.esafetylevel.eu/group/teacher/incident-handling), as this enables

schools to share and learn from each other's strategies.

Staff policy

- › As new technology and online practices emerge the borders of acceptable practice are constantly blurred. This is something that needs to be discussed at staff meetings often. Could you create a tutorial on professional online conduct of staff and upload it to your school profile via your [My school area](#) so that other schools can benefit from your good practice?
- › Ensure that all staff understand the school's regulations on use of personal mobile devices in the classroom; these should be clearly communicated in the School Policy. Monitor the effectiveness of the policy and ensure that it is adhered to. You can also advise your staff to read the fact sheet Using mobile phones at school (www.esafetylabel.eu/group/community/using-mobile-device-in-schools).

Pupil practice/behaviour

- › You have defined electronic communication guidelines in your Acceptable Use Policy and this would be a useful example of good practice for other schools. Can you create a tutorial about electronic communication guidelines for pupils and upload it to your school profile via your [My school area](#) so that other schools can benefit from your experience.
- › Your school has a school wide approach of positive and negative consequences for pupil behaviour. This is good practice, please share your policy via the [My school area](#) of the eSafety portal so that other schools can learn from it.

School presence online

- › Check the fact sheet on Taking and publishing photos and videos at school (www.esafetylabel.eu/group/community/taking-and-publishing-photos-and-videos-at-school) to see that your School Policy covers all areas, then upload this section of your School Policy to your profile page via your [My school area](#) so that other schools can learn from your good practice.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

Practice

Management of eSafety

- › In addition to a clear designation of responsibility to ensure that all necessary network security and user privacy checks are in place, it is essential that schools also have audit and procedural checks at regular intervals. Without this, a school will be leaving itself vulnerable. See our fact sheet on School Policy at www.esafetylabel.eu/group/community/school-policy. Although there should always be an overall lead person on eSafety just as you have in your school, everybody in the school has a shared responsibility to secure any sensitive information used in their day to day professional

duties. Even staff not directly involved in data handling should be made aware of the risks and threats and how to minimise problems. Use our fact sheet Acceptable Use Policy

(www.esafetylabel.eu/group/community/acceptable-use-policy-aup-) to ensure that everyone plays their part in ensuring they are all the best and safest digital citizens they can be.

- › Ensure that the governor or board member appointed for eSafety has the opportunity to receive regular training and also to ensure that colleagues are aware of eSafety issues. Involve your governing body in the development and regular review of your School Policy. See our fact sheet on School Policy www.esafetylabel.eu/group/community/school-policy.

eSafety in the curriculum

- › It is good that eSafety is taught as part of the curriculum in your school. Ensure that all staff are delivering eSafety education where appropriate throughout the curriculum and not just through ICT or Personal Social and Health lessons. You/your staff may find some useful ideas and resources in the fact sheet Embedding eSafety in the curriculum at www.esafetylabel.eu/group/community/embedding-online-safety-in-curriculum.
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).

Extra curricular activities

- › Gather feedback from pupils to see what sort of additional eSafety support they would benefit from outside curriculum time. Could they be involved in delivering some of this to their peers? Check the resource section on the eSafety Label portal to find resources that will help them do this; check out the fact sheet on Pupils' use of online technology outside school at www.esafetylabel.eu/group/community/pupils-use-of-online-technology-outside-school.
- › Consider sharing the information you have about your pupils' online habits with other schools through the eSafety Label community. You could, for example, upload your latest survey findings on pupils' online habits to your school profile via your [My school area](#).

Sources of support

- › All staff should have some responsibility for eSafety. School counsellors, nurses etc. are well placed to provide advice and guidance on these issues and should be invited to contribute to developing and regularly reviewing your School Policy. Consider whether it is appropriate to provide training for these staff.
- › It is great that in your school pupils are actively encouraged to become eSafety mentors. You might want to share your approach to strengthening this network with other teachers on the eSafety Label website via the forum or your school's profile page, so that others can replicate it.

Staff training

- › It should be a real benefit to your pupils that all staff receive regular training on eSafety issues. Continue to

gather feedback from staff on the medium- and long-term benefits of the training and consult the eSafety Label portal to see suggestions for training courses at www.esafetymlabel.eu/group/community/suggestions-for-online-training-courses.

- In your school knowledge exchange between staff members is encouraged. This is beneficiary to the whole school. Upload PowerPoints, documents or similar of knowledge exchanges on eSafety topics via the uploading evidence tool, accessible also via the [My school area](#).

The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.
